Identification
Records identified from databases (n = 788)
IEEE Xplore, primary string (n = 188)
Lens.org, primary string (n = 124)
Lens.org, secondary string (n = 476)
Records removed before screening
Duplicates (DOI, then normalised title)
(n = 93)
Screening
Records screened by title, abstract and keywords
(n = 695)
Excluded: no meta-learning or few-shot term
(EC1, keyword pre-screen) (n = 466)
Records assessed for publication type
(n = 229)
Excluded: preprint, chapter, editorial, dataset,
report or thesis (EC4) (n = 29)
Records read at title-and-abstract level
(n = 200)
Excluded (n = 136)
Meta-learning in another sense, or no
anomaly/fault task (EC1) (n = 83)
Image-only data (EC2) (n = 50)
Survey, no method to classify (n = 2)
Plain application of an existing method
(EC3) (n = 1)
Included
Records retained from the searches
(n = 64)
Added from the authors' reference lists,
not retrieved by either string (n = 2)
Studies included in the review and coded on the
four taxonomy axes (n = 66)
